

Service Information Letter

CHRISTIE

Subject: CASP and CDC-65 Calibration

SIL#2-CASP

Models: CASP/1200, 1500, 2000, 2100, 2200, 2300, 2500, CDC-65

February 2013

Summary: This Service Information Letter is to inform CASP users that calibration and repair of all models shown above should be performed only by a Factory Authorized Christie CASP Calibration & Repair Center or the Factory. This equipment should be calibrated and serviced every 12 months to assure continued reliable operation and accuracy. The procedures in Technical Manual TD-617, TD-647, TD-634 and Chapter 22 in TD-686 are no longer valid and cannot be used. T.O. 33K1-K1-4-3187-1 is not a factory approved procedure and voids the warranty if utilized. Calibration and repair procedures are only distributed to the facilities listed below.

Background: An industry-wide trend in metrology and calibration is focusing on improvements in procedures that reduce the probability of false acceptance. In response to this trend, calibration is now performed using proprietary software, test fixtures, procedures, maintenance checks, firmware and circuit modifications/upgrades which require specialized training and years of experience. There have been problems associated with calibration verification in the field by non-authorized calibration providers. Unauthorized field calibration or repair can directly impact the proper function, reliability, accuracy and service life of this equipment. If the CASP or CDC-65 is calibrated by a non-authorized facility, it will void the factory warranty.

Locations: Factory Authorized Christie CASP Calibration & Repair Centers are located around the world to provide global support for the CASP product:

USA: Marvel Aero International, Inc.
21 Rancho Circle
Lake Forest, CA. 92630
